FUNCTIONALITY
INTERACTION
INTUITION
INNOVATION

The WingBox provides its fortunate users with the latest innovations in multi-touch and multi-user interface activity - where our physical and virtual worlds enter into seamless and instant integration using only our hands...a very intuitive interface...no mouse, no keyboard.

The Wingbox's "Hands On" interface is so intuitive that people with little or no computer experience are able to approach the table and effortlessly begin interacting with the interface within just a few seconds.

This multi-touch interface not only makes completing everyday tasks fun and easy for any user, it is capable of creating a very high level of collaborative achievement between multiple users while working creatively in team environments.

Whether its users originate from such industries such as education, engineering, tourism, events and exposition, marketing or the entertainment industry, the Wingbox will compel its users and its audiences to experience more!

Check out the Wingbox at a dealer near you.
